

THE SEVILLE JOURNAL

Some ice storm we have been having for the past few days. It was a beautiful scene. The trees were beautiful in their coat of ice and icicles hanging everywhere. I wish I were a poet I would write something real nice about this ice storm. Well, it was beautiful if you were on the inside looking out and well shod when you stepped out. Seville was fortunate, no damage done thus far and no serious falls. (Knock on wood.)

The city hall is having a surprise party—a new coat of paint and paper. The roof needs papering too, it leaks. Fellows, you commenced at the wrong end.

The Seville Milling Co. are not doing much business these cold days on account of the low pressure of gas. The proprietor, A. H. Reichstiner has a heart and is letting the people who are depending on gas for heat have what little there is to keep from freezing.

Two big bobsleds of 6th and 7th grade pupils and their teachers, of Lodi, came to Seville on Thursday evening for a ride. They were so cold their teeth chattered. That goes with sleigh-riding. They enjoyed it. The teachers hiked home on Friday evening, regardless of the ice storm. The cars were on the bum but I guess they got there.

Charles Rodgers' orchestra played for a dance at Rittman on Friday evening. They must have skated down it was so icy.

One of the mail carriers evidently started on his route before it commenced raining on Friday morning. He went in a sleigh and when he got back there was a fringe of icicles all around his hat. He looked like an almanac picture.

Mr. and Mrs. W. H. Bodger received a message from their son Billie Bodger, of Alton, Ill., announcing the arrival of a little son on Saturday morning. Mother and baby are doing well. Mr. and Mrs. Bodger lived in Seville for a few months and had many friends among the young people.

Harold Phelps is improving and able to be out for a little fresh air.

Mrs. Alice Squires is getting better and is able to sit up a little.

Mrs. A. S. Foster is sick with a hard cold at this time.

Mrs. Charles Cook started down town during the ice storm, took a double header and landed in a big snow drift very gracefully. She was glad for the beautiful soft snow.

A scene in Bringing up a Husband was played at the town hall Tuesday night by the Otis Stock Co.

A big crowd attended the picture show given by the Y. M. C. A. boys at the school auditorium last Saturday night. The boys cleaned up quite a bunch of money. So many of these good things are given on Saturday night when the clerks and storekeepers are too busy to go. It is possibly the best night for the general public is the reason.

Soldiers of the American Army are credited by the French Government with being largely instrumental in winning the victory which came Nov. 11, 1918, when the armistice Germany begged, was granted. This appears in a souvenir pamphlet dedicated to the American soldiers who fought overseas and which will soon be presented through Joseph Fixler Post to every American soldier who saw service and who did not receive one before leaving France.

The memorial voices the feeling of France to America and America's noble sons, not omitting those who gave their ALL for Liberty. In an eloquent introduction, appears this high tribute to American soldiers.

"At the most critical moment of the struggle which had lasted for three years against German imperialism, you came as strong youths into a country where the young had perished. To the weeping you brought a smile, to those who had been despoiled your generosity restored hope and to the fatherless children you offered joy. The summing up of these recollections must remain an inspiration to you and to those who follow you, in all future efforts.

Often, marching toward dusk, along some valley road in France you have watched the lights as they began to shine out from the windows of the little farm houses, while the mist gradually enveloped all but the shadowy forms of objects almost indistinguishable. Let it be so in

your minds when you think of France; remember the innumerable small house which almost two million men have died to save, and those hearths where a fire still burns, though the poilu who left it will never return. If any harsh thoughts remain, let the mist unfold all that is not the romance of this war—the drawing together in fraternal love of those who have suffered. This is the prayer, of France. Together with the gratitude of her living, there is the stirring memory of her dead. It carried its message to you, as a blessing from those who, because of your gallant sacrifices, shall not have given their lives in vain."

The memorial in fact is a history in tabloid form of America's participation in the war, beginning with Cantigny where the gallant 1st Division made history, to the attack on the heights of Sedan, just before the Armistice was granted.

A supply of these memorials will be shipped to Joseph Fixler Post through the Recruiting Service of the Army. On receipt they will be issued by Joseph Fixler Post to every man entitled to receive it.

Mr. Cunningham, while not at all well, is somewhat better and more comfortable than a week ago.

STIMULANTS FOR EGG LAYING NOT FAVORED
"With the high price of eggs during the winter months, farmers have been tempted to feed their poultry one of the many highly advertised poultry stimulants," says E. L. Dakan, poultry specialist at the Ohio State University. "These stimulants contain no food value whatever and the chief benefit derived from feeding them is in following the directions very closely. The directions specify that the fowl should be given about the same ration that we are recommending here at the University. This information can be had by the farmers free without buying it by the bottle at a dollar an ounce."

"If there is any stimulating effect from feeding these various stimulants it is accomplished by raising the body temperature of the fowl to the point

where she actually breaks down enough of her body material with it to make an egg. This of course carried to any great extent is bound to weaken the constitution of the bird. "Anyone who feeds poultry stimulants during the winter months will find that their eggs hatch poorly and that there will be high mortality among the young chicks."
